

FINANCE COMMITTEE

Plan of Action

2020-2021

The interruption of the Covid-19 has changed many things for all of us. As we begin our 2020-2021 year we look forward to working with the Department officers and Unit members. The committee will serve to the best of our ability to meet the responsibility assigned to us in the Constitution and By Laws of the Department of Texas.

We will strive to keep the DEC aware of the budget and finances of the Department with updated budgets and bank balances at the end of December, April and end of the year August 31, 2021. A budget is based on past history and estimating accomplishing new areas of loss or profit. The preparation of one can be a challenge for the committee, but it will be forth coming.

Our plan is to present several money making project to improve our financial position and we will need your full sport on them. The loss in membership over the past few years has taken a toll on our funds and reserves.

We encourage all units to file your 990-EZ taxes, 8822-B change in officers form, plan a budget for your unit and definitely large or small do your internal audit on your unit funds at least once each year. We are an organization, but our operations are also a business that we must protect.

The members of the Finance Committee will assist and answer any questions or concerns you have on your financial operations. We may have to research it in order to provide you with correct information. Do not hesitate to contact the members if you need help and you can reach them at the information below.
